

# ASTM CORPORATE PORTALS

## *Easing the Pains of Research, Communication, and the Preservation of Corporate Knowledge*

Combine ALL the Federal, state, and corporate regulations and statutes you need with all the necessary standards from ASTM and other SDOs into one database.

**Now, add functionality that enables you to:**

- ▶ link these standards,
- ▶ add notes, images, and attachments for others to view,
- ▶ make side-by-side comparisons of standards to view modifications,
- ▶ and more.

The result is a flexible and dynamic web portal from ASTM International and Citation™ that arms you with not only the information you need but also the ability to share it, archive it, and most importantly apply it faster, better and cheaper than ever before.

*The pains of researching and finally obtaining the right versions of standards are relieved.*

*The aches of not having everyone onsite to discuss concerns have been lifted.*

*The anguish (and cost) of documenting, preserving and verifying procedures for the future of your corporation have been avoided.*
