

IEEE Draft Standards Online

IEEE *Xplore*[®] Digital Library Add-On Subscription Option

Add IEEE Draft Standards to your IEL subscription—and get an edge on the competition

With easily-searchable access via IEEE *Xplore*, immediate updates and automatic alerts, **IEEE Draft Standards Online will maximize research and development and provide your organization with the competitive advantage it needs.**

By adding IEEE Draft Standards, your organization can see a standard before it is published to help facilitate early compliance and implementation. Gain an early understanding of standards under development and get advanced insight into solutions and practices being proposed.

IEEE Draft Standards delivers key benefits for your research team:

- Access the full-text of all IEEE drafts standards
- Increased productivity by having all your standards in one place
- Real-time updates to the most vital standards in your industry
- Trace the evolution of a standard with archive of 1,000 drafts

For a complete listing of all IEEE Draft Standards in IEEE *Xplore*:

- Go to www.ieee.org/ieeexplore
- Perform a search
- Refine your search by content type “standards”
- Further refine by “standard status”

IEEE Draft Standards Quick Facts

Add IEEE Drafts Standards to your IEL subscription and get the information you need:

Unapproved Drafts—a combination of revisions of previous standards and brand new ideas that are still in the standards development process

Approved Drafts awaiting standard publication (it usually takes 3 to 6 months for approved standards to be published)

Approved and Archived Standards that have been superseded by a published standard provide the complete history of a standard's evolution
