State of the Art Educational Modules

- Engaging, interactive animations
- Colorful diagrams and charts
- Audio overlay for all course slides
- Self-paced learning via automatic place marking
- Flexible controls to repeat course audio and slides or skip to another section
- In browser testing with results available immediately

▼ Full diagrams and animation

Displays a linear view of the course pages where icons can be clicked to skip around

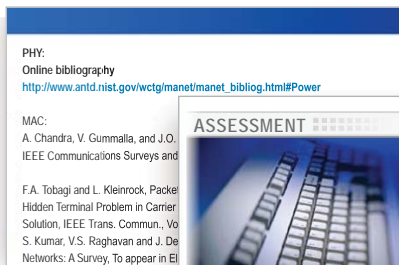

Click the autoplay button to have the course automatically advance to the next screen (except where there is an interactive screen — press play after you have completed the interactivity)

Stops the audio and visual

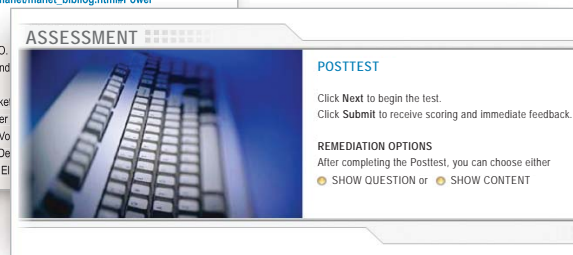

▲ Automatic place-marking and flexible controls ►

Click this button again to continue playing

◀ Glossaries and references

▲ In-browser testing, with results available immediately!

“The content was much better than other courses I have taken. Also, it moved quickly enough that I was never bored.”

Quality. Depth. Value.
Essential information from IEEE.

- IEEE conference tutorials and short courses offered by subject matter experts
- Timely, high-quality, and leading-edge educational products
- Selected and peer reviewed by IEEE societies
- 1-hour modules
