

More than 237,000 historic IEEE papers and counting...

IEEE Xplore® gives you access to the engineering industry's most important and revolutionary historical papers

THE IEEE LEGACY PROJECT is part of IEEE's plan to digitize all papers from its technology journals, in an effort to bring historic, scholarly content to new generations of researchers and practitioners. The collection represents a critical evolutionary period that chronicles the development of today's information age. With the addition of these historic publications, researchers will have access to a tremendous repository of papers by visionaries in the electrical engineering profession.

The IEEE Xplore digital library currently contains more than 1.6 million documents. Included are papers from more than 130 IEEE journals, 900 active IEEE standards, and over 750 annual conferences proceedings. The majority of the content dates back to 1988, though content from select publications dates back as far as 1913.

Subscribers to the IEEE/IET Electronic Library (IEL), IEEE Enterprise, and IEEE Member Digital Library have access to this material as part of their subscriptions.

Recent legacy additions:

- Complete collections of *Proceedings of the IEEE* and *IEEE Computer Magazine* issues
- Historical digital content from over 40 more IEEE titles including:
 - *IEEE Acoustics, Speech, and Signal Processing Newsletter*
 - *IEEE Control Systems Magazine*
 - *IEEE Electron Device Letters*
 - *IEEE Journal of Quantum Electronics*
 - *IEEE Transactions on Aerospace and Electronic Systems*
 - and many more
- Papers from European solid-state circuits and device research conferences dating back to 1953
- Select engineering publications dating back to 1913
