SAE MOBILUS
RELEASE NOTES

May 2, 2019 Release

The following are the May 2, 2019 Release Notes. The items listed below outline the major feature and functionality changes that have been developed in the SAE MOBILUS platform. Other feature enhancements and defect corrections have occurred but are not documented below.

BROWSE REDESIGN

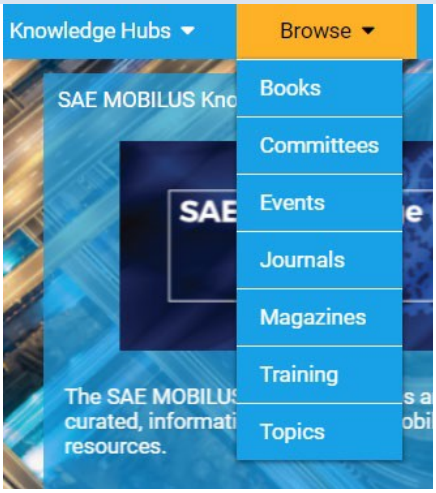
DESCRIPTION:

The introduction of a "Browses" page last year was very successful and garnered a lot of site traffic. However, because of the way the page was structured, we were not receiving accurate metrics for each "Browse" category.

SOLUTION:

The "Browse" page tab in the main site navigation was redesigned to be a drop down allowing greater metrics to be captured for each Browse Category.

The "Books" Category has also been broken into two sections: Recently Published and Most Popular.



SAE MOBILUS NOTIFICATIONS

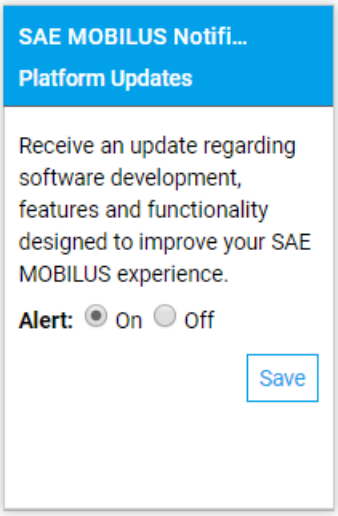
DESCRIPTION:

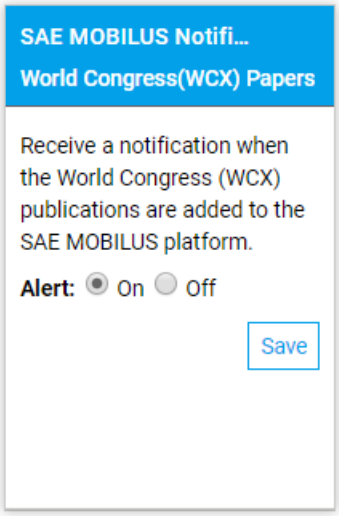
We have heard from multiple end users that they want to know when there are Platform updates, and when publications such as the WCX technical papers..

SOLUTION:

Two SAE MOBILUS notifications were introduced in the platform.

1) WCX publications published and available for download
2) SAE Platform updates

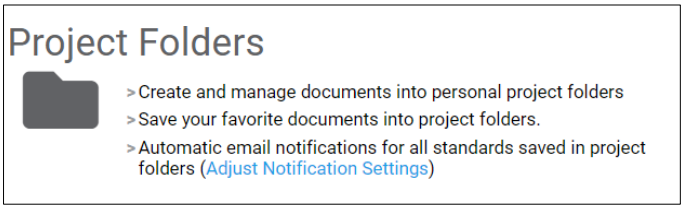




FAVORITES CHANGED to "PROJECT FOLDERS"

DESCRIPTION:

The team has been working towards offering folder collaboration in SAE MOBILUS. This functionality will be rolled out slowly over the next few months. This change has required updates to language, and work flow in the platform to accommodate the collaboration workflow and direction.



SOLUTION:

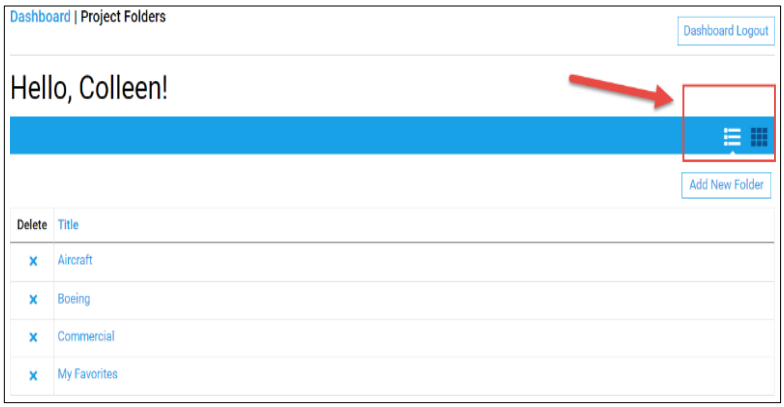
In the Dashboard, the existing "Favorites" icon has been renamed to "Project Folders". This was implemented to support the future workflow of end users collaborating in a project with publications.

The permissions for collaborating is in progress and will be released at a future date.

FAVORITES CHANGED to "PROJECT FOLDERS"

DESCRIPTION:

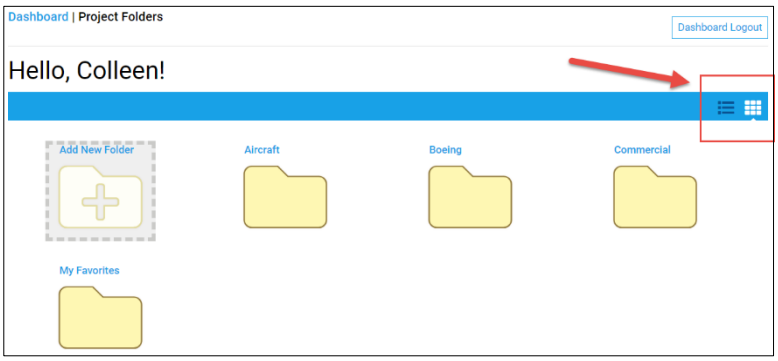
The team has been working towards offering folder collaboration in SAE MOBILUS. The workflow for collaboration has required visual improvements and modifications to be made to the existing "Favorites" folder.



SOLUTION:

The "Favorites", newly named Project Folders, homepage has been updated with both a list and a grid view. The list view (image 1) below will be the default view due to additional functionality that will be present for collaborating. The user has the option to toggle between the two views using the available icons.

Inside the parent folder, any existing subfolder icons have been updated in appearance to differentiate from the publication icon.



FAVORITES CHANGED to "PROJECT FOLDERS"

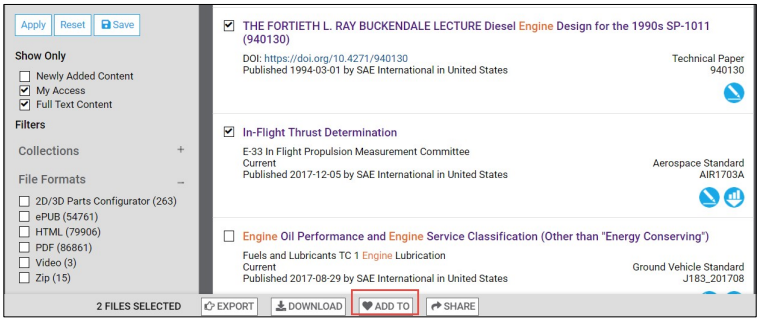
DESCRIPTION:

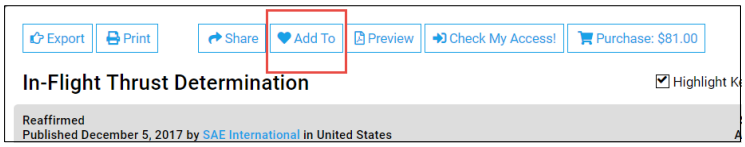
The team has been working towards offering folder collaboration in SAE MOBILUS. This functionality will be rolled out slowly over the next few months. This change has required updates to language, and work flow in the platform to accommodate the collaboration workflow and direction.

SOLUTION:

On all product landing pages, and the search result task bar, the "Favorites" button has been updated to "Add to". This has been done to match the future collaboration work flow in which the end user will have to choose where and how to "Add to" a folder the selected publication.

The buttons on the Summary and Detail page have also been reordered.





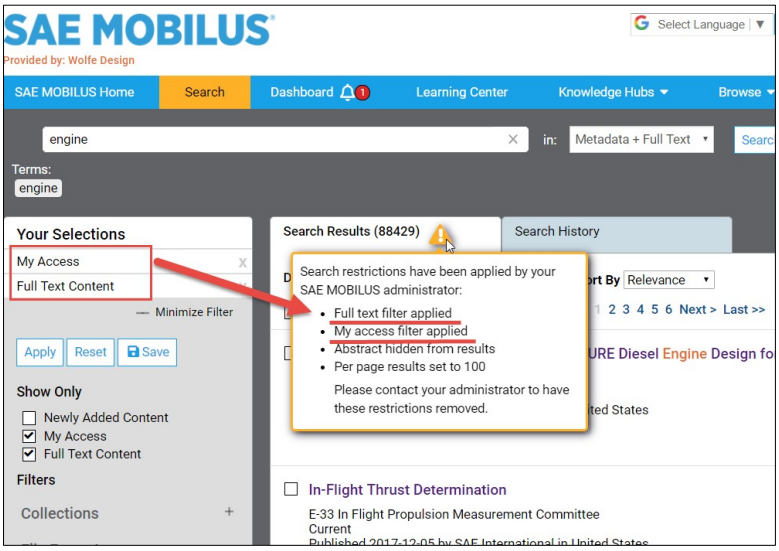
FAVORITES CHANGED to "PROJECT FOLDERS"

DESCRIPTION:

In 2018, the ability for the Admin to set personal search preferences for a subscription was implemented. This was based on direct customer feedback for the functionality.

SOLUTION:

The ability for the end user to know that a search restriction is applied has been implemented. A "warning" icon has been added to the search result page if search customization has been applied by the administrator for the subscription.



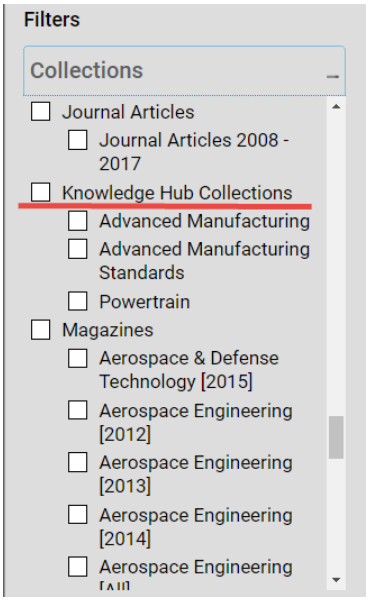
KNOWLEDGE HUB ADDED TO FILTER

DESCRIPTION:

Subscribers to the Knowledge Hubs were confused when searching, as the term ‘‘Knowledge Hub’’ did not appear in the filters. This was due to the filters representing the collection names, and there is no ‘‘Knowledge Hub’’ collection.

SOLUTION:

Subscribers to the Knowledge Hubs were confused when searching, as the term “Knowledge Hub” did not appear in the filters. This was due to the filters representing the collection names, and there is no “Knowledge Hub” collection.



IMPROVED READABILITY

DESCRIPTION:

Content is king! And to ensure that the content remains the highlight of the platform, improvements to the readability of the site were made.

In addition, customers voiced that the search results were difficult to read because of the spacing and font.

SOLUTION:

Consistency and a typography style guide were established for MOBILUS that increased the readability of the site and helps to support ADA.
